PATIENT WEIGHT IN KILOGRAMS

Disclaimer: This plate selection chart is a guide. The plate, pin and screw selections remains the surgeon's decision, considering specific factors such as complexity of the fracture, age of the patient, body mass index, owner compliance. We encourage surgeons to call Movora and be placed in touch with board certified surgeons on staff to review x-rays and offer FREE recommendations as to what implants to be used in uncommon / challenging situations in order to achieve desired outcomes.
